President Calles Issues Warn-
ing Against Opposition to
Laws of Country

Mexico City, July 26—"Every new
manifestation of opposition to the laws
of Mexico will be met by further re-
pressive measures."

President Plutarco Calles, of Mexico,
issued this statement today in reply to
the manifesto of the Catholic episcopate
of Mexico ordering services in all Cath-
olic churches in Mexico suspended on
July 31. The manifesto was signed by
the Archbishop of Mexico, the Most
Rev. Monseñor Rio, the seven other
archbishops and 29 bishops.

Suspension was ordered in protest
against the new religious regulations
promulgated by the Mexican govern-
ment. The manifesto, which took the
form of a pastoral letter, lists the
penalties which may be imposed on
those of the Catholic faith responsible
for the new laws, including ex-commu-
nication. Although formal services will
cease in all churches, they will remain
open for prayer and meditation.

Calles, in his statement, charged that
the present disturbances throughout
Mexico were the result of efforts of "re-
volutionary elements to overthrow the
revolutionary government under the
case of religious zeal."

Chicago, July 26—Samuel Insull, the

Illinois senatorial primary as the sen-

an investigation of charges of fraud
and corruption in the recent election in

Insull was revealed as a contributor
to both republican and democratic can-

Frank J. Smith, republican victor,
the first witness, testified Insull gave
"around \$100,000" to his campaign fund.

Smith also declared that the primary
cost of his fare for the senate was
\$200,000. He did not know exactly how-
ever, he told the committee. Butler,
George L. Brennan, who won the dem-
ocratic nomination, told the Inter-
national News service that Insull con-
tributed \$150,000 to his campaign. He
added that he "knew" that Insull had
given \$125,000 to the Smith fund.
Smith, the senator and chairman of
the Illinois Public Utilities Commis-
sion, said he "was frankly surprised"
at the size of Insull's contribution. He
did not know why Insull had been so

The Value of Reputation

The value of a man is what he does, the worth he shows the world. He may be ever so good inside. If he doesn't prove it, he's worthless.

The value of a watch, a skillet, an automobile, is what it does, the worth it shows its user. It may be of the highest serving power. If it can't prove it, it's useless. The reputation of any product is the known proof of its worth. The value of that known proof is that you can recognize it.

When you buy an advertised watch or skillet, you buy value with a reputable manufacturer's name behind it. You don't have to wait till you use it to know it. The qualities which made it advertisable have proved the worth for you. You need only ask for the product by name. Fastened securely to that name are quality, service, satisfaction.

Read The Advertisements. They
familiarize you with established
reputations

ADVOCATE MARRIED SCHOOL TEACHERS

Jugo Shavins Educational Heads Adopt Solution to Unhappy Problem

Edgemoor, July 26.—Jugo Shavins, educational authorities, have adopted a solution to the problem of married school teachers.

Deceased is impudently the leading factor. If the married teacher can prove that she lives in perfect harmony with her mate, the authorities will allow her to teach but the present will be withdrawn when and if the present condition of the teacher is disturbed.

The government evidently believes in the inferior position of the female. For they have decided that no woman will be allowed to teach if it is proved to be a teacher who holds an inferior position to her. Such an arrangement is not so desirable to the community as it is to the teacher.

No women teachers will be allowed to marry without permission of the authorities.

To gather the flowers for New Garden Museum two Englishmen have started from London. They are in a boat of several thousand miles, part of it in the Arctic Circle in Canada and Alaska.

A Worth While Growth

The remarkable growth of the electric industry in the United States is a tribute not only to the inventive genius and the faith of capital but to the efficiency of management. The industry has expanded without burdening the government or the public with any interference on the part of the government or for that matter, at all from the government. It has been developed by private capital, and most efficiently.
